The company needs more time to prepare and submit product chemistry information. There are various Physical/ Chemical data gaps for the TGAI (Manufacturing Use Product) application.

**Describe Interactions with Company (describe when contacted and company's response including response to previous negotiated due dates):**

The Chemist in TRB contacted the Registrant on June 30 (to let him know about the data gaps). On July 5<sup>th</sup> after speaking with the registrant, it was determined that an extension would be needed to submit the required product chemistry data.

Subject

Dear Mr. White,

Pursuant to our discussion today Albaugh requests a PRIA extension date of November 6, 2007 for the following registration applications:

Oxyfluorfen TGA1 (EPA File Symbol 42750-RGL)  
Oxyfluorfen 2EC (EPA File Symbol 42750-RGA)

This will provide Albaugh with time to prepare and submit product chemistry information to address the various Phys/Chem data gaps for the TGA1 application as outlined by Dr. Rate.

We have contacted the surfactant supplier for the composition information on the 2EC formulation and hope to have that for Dr. Rate in the next few days. We will also be submitting a corrected CSF for the 2EC to align the active ingredient percentage with that of the submitted label.

Please call if you have any questions.

Regards.
